PROFESSIONAL SUMMARY

Senior backend engineer and CTO who designs and ships scalable, multi-tenant SaaS on AWS. I built Owly CRM from zero to a production real-estate intelligence platform — 30+ Django services, real-time collaboration, enterprise ERP/bank integrations and applied AI. With a background in Economics (former investment analyst), I connect technical architecture to business outcomes. Open to senior, lead or staff backend, platform or AI engineering roles — remote.

KEY HIGHLIGHTS

- **Architected a multi-tenant SaaS from scratch** with ORM-level tenant isolation — 30+ modular Django apps running on AWS.
- **Built a real-time layer** (Django Channels / WebSockets) powering live quote collaboration and omnichannel messaging (WhatsApp / Email / SMS).
- **Shipped production AI** — LLM agents (Anthropic Claude, OpenAI), ElevenLabs voice agents, and ML-based adaptive lead scoring (scikit-learn).
- **Delivered enterprise integrations** — a 150+ endpoint SINCO ERP connector and a Davivienda mortgage-bank integration.
- **Owns cloud infrastructure end-to-end** — AWS (ECS Fargate, S3, SES, CloudFront), Terraform and CI/CD pipelines.

TECHNICAL SKILLS

Languages & Frameworks	Python, Django, Django REST Framework, JavaScript, TypeScript, React
Data & Messaging	PostgreSQL, Redis, Celery, Django Channels (WebSockets)
Cloud & DevOps	AWS (ECS Fargate, S3, SES, CloudFront), Terraform, Docker, CI/CD (GitHub Actions, GitLab)
AI / ML	LLM agents (Claude, OpenAI), scikit-learn, applied ML, agent & prompt design
Architecture	Multi-tenant SaaS, REST APIs, microservices, real-time systems, system design, scalability
Leadership	Tech leadership, mentoring, code review, Agile / Scrum, technical roadmap
Domain	Fintech, ERP & banking integrations, financial modeling (Economics background)

PROFESSIONAL EXPERIENCE

Chief Technology Officer (CTO) — OWLY SAS (Owly CRM)

2024 – Present

Lead architect and engineer of a multi-tenant real-estate intelligence SaaS, owning the stack from API to AWS infrastructure.

Designed the backend from the ground up (Django 4.2, DRF, PostgreSQL 16, Redis, Celery across 30+ modular apps) with ORM-level tenant isolation and a real-time layer (Django Channels / Daphne). Built a 150+ endpoint SINCO ERP connector and a Davivienda mortgage-bank integration. Shipped ML-based lead scoring (scikit-learn) and an AI-agents platform (Claude, OpenAI) with ElevenLabs voice agents. Provisioned AWS infrastructure (ECS Fargate, S3, SES, CloudFront) with Terraform and CI/CD (GitHub Actions / CodePipeline). Designed financial engines: commission tiers and an opportunity-cost quote-discount engine. Set technical direction and mentored the engineering team.

Backend Developer II — MO Credit Management Platform

Prev. role

Built and maintained Python/Django microservices for a credit-management platform.

Developed scalable backend services with a microservices architecture; integrated AWS (S3, EC2, Lambda); managed PostgreSQL for data integrity and performance; maintained CI/CD pipelines on GitLab; containerized with Docker; worked in Agile sprints with Jira.

Web Application Developer — CERAC

Prev. role

Delivered a Flask web application for survey, user and question management.

Implemented user authentication, database operations and form management for a research organization's data-collection platform.

ICT Developer — INVIAS

Prev. role

Built data-analytics and reporting tooling for a national infrastructure agency.

Managed ICT and geographic information systems with advanced data analysis and visualization; built a Flask report generator (HTML/CSS/JS) with custom filtering and multi-format export (PDF/CSV).

EDUCATION

Continuous Tech Education — Platzi

2022 – Present

Python, Django, AWS, frontend development and backend technologies.

Economist (B.A.) — Pontificia Universidad Javeriana

2010 – 2015

Bachelor's Degree in Economic and Administrative Sciences.
